

SERVICE BULLETIN

DATE:	JAN 1, 1993	SERVICE BULLETIN #	1515	# OF PAGES:	1
SUBJECT:	TELESIS PRODUCT IMPROVEMENT MODS				
STATUS:	RECOMMENDED				

IDENTIFICATION: Telesis container assembly P/N 4113-() all sizes and Telesis harness assembly P/N 5113-().

BACKGROUND: Over the production life of the Telesis certain product improvements have resulted in better fit, ease of use and packing, and more durability. These improvements include the following:

1. Improved main riser covers .
2. Main ripcord location moved forward for better visibility and accessibility.
3. The Reserve Staticline installation re-designed for less wear.
4. TOP pocket changed to Spandex.
5. Harness Main Lift Web Adjust-A-Tongues re-designed for easier adjustability.
6. Re-design of the reserve freebag to the MK-3 design, incorporating bridle assist pockets.
7. Upgrading of the reserve Pilotchute to the 44 Magnum.
8. Upgrading of the main pilotchute to the 357L.
9. Adaptation of the Cypres AAD system.

SERVICE BULLETIN: Any or all of the above upgrades are available to Telesis produced prior to this date. These may be accomplished either at the factory or an Authorized RI Service Center.
